

How to get started with ML ?

By Krupa Galiya

About me

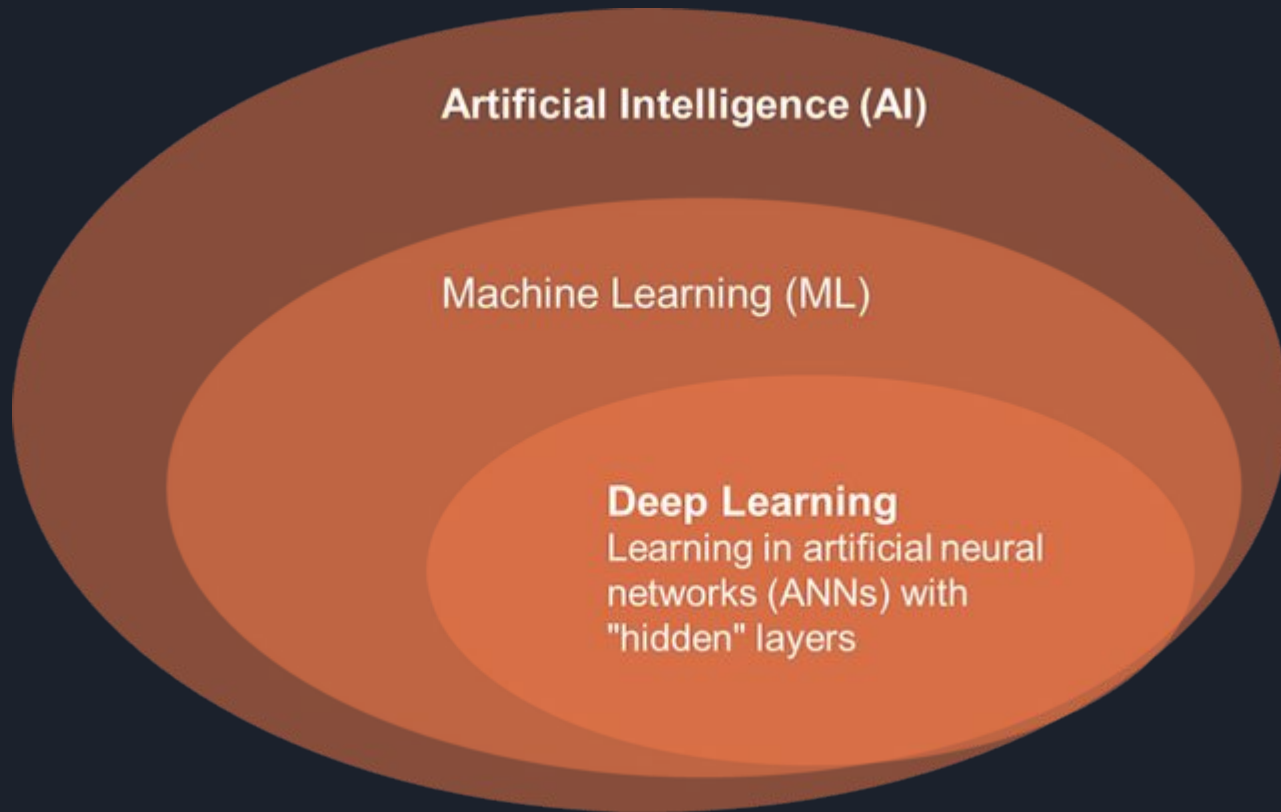

Krupa Galiya

- 2nd year Student at Vishwakarma Government Engineering College, IT
- Learner, PyGirl

Email : krupagaliya@gmail.com

AI , ML and DL

Machine learning algorithms:

Given a Prior Information about data

Prior Information unavailable
Learn by Itself

Supervised learning

Unsupervised learning

Classification

Map Input
variables/features to
some discrete value

Regression

Map Input
variables/features to
some Continuous value

Data analysis to find
hidden patterns/grouping
in data

Why this is so popular ..?

- It combines statistics, life sciences and advanced computing to create computers that think and predict better
- Anything that benefits humans largely has always been popular, having said that ML should definitely be popular

Wanna start ML/DL....

The *best* way to learn something is, really, a personal thing. The most obvious thing is that it depends on what you already know. Moreover, you must consider what you want to learn. But, the most important in my opinion is why you want to learn.

Resources

- Prerequisite

1) Programming language(Python or R or JAVA or MATLAB or C++)

2) Mathematics

- Calculus
- Mathematical statistics and Probability
- Basic Linear Algebra
- Graph theory

Online Courses

1

Machine Learning
by Andrew Ng on
coursera by
Stanford University

(highly recommended)

2

Deep Learning
Specialization by
Andrew Ng and his
team on coursera

3

Machine Learning
A-Z™: Hands-On
Python & R In Data
Science

You Tube

Google Developers

Sentdex

INTRODUCTION TO NEURAL NETWORKS

Jabrils

 Baroda

Video Description

...

Some best Books

- Introduction to
ALGORITHM
(3rd Edition) by
Cormen
- Deep Learning by
Ian Goodfellow
- Make Your Own
Neural Network
by Tariq Rashid

Towards Data Science

Keep updated
by Blogs and
websites

Don't forget to read and understand *RESEARCH PAPER*.

Try kaggle competition

Select datasets to work on and practice the process
